DOSOMAT Packaging Solutions

Your specialist for customised packaging lines

All-in-one solution for customised packaging lines

With our Dosomat filling, sealing and packaging machines, we offer customised solutions for the safe, hygienic and efficient filling of a wide range of food and pet food products.

Each machine is customised and developed to fulfil the customer's specific requirements – whether for small craft businesses or large-scale industrial production.

Service

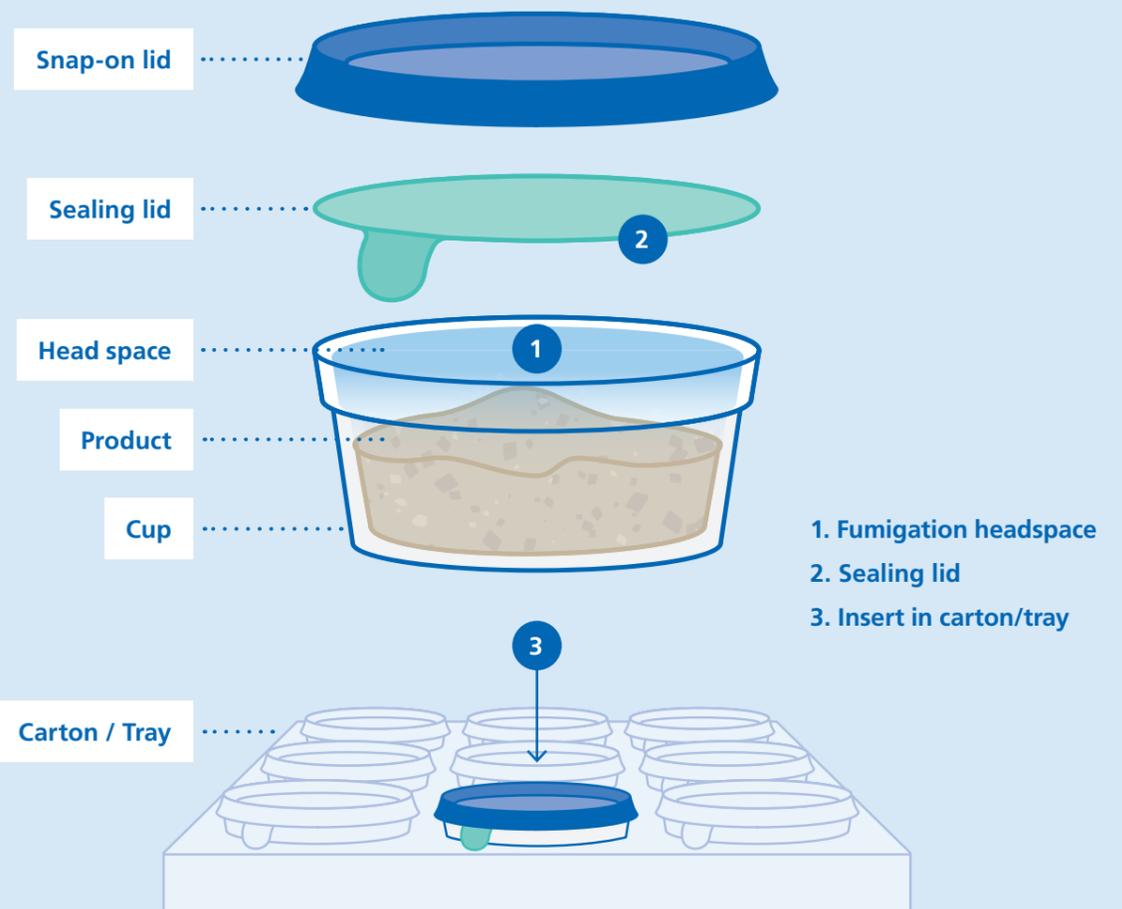

Carefully packaged flexibility

All consistencies, various sizes, broad performance spectrum: We develop and manufacture filling and sealing machines in uncompromising quality and with state-of-the-art technology that work with the highest precision and reliability. From food and animal food to cosmetics and pharmaceuticals, customer-specific

applications always define what a Waldner filling and sealing machine can actually achieve. Packaging sterilisation processes for food hygiene included. Ask us about digital labelling for tracking your production batches - for safety, transparency and simple traceability at every production step.

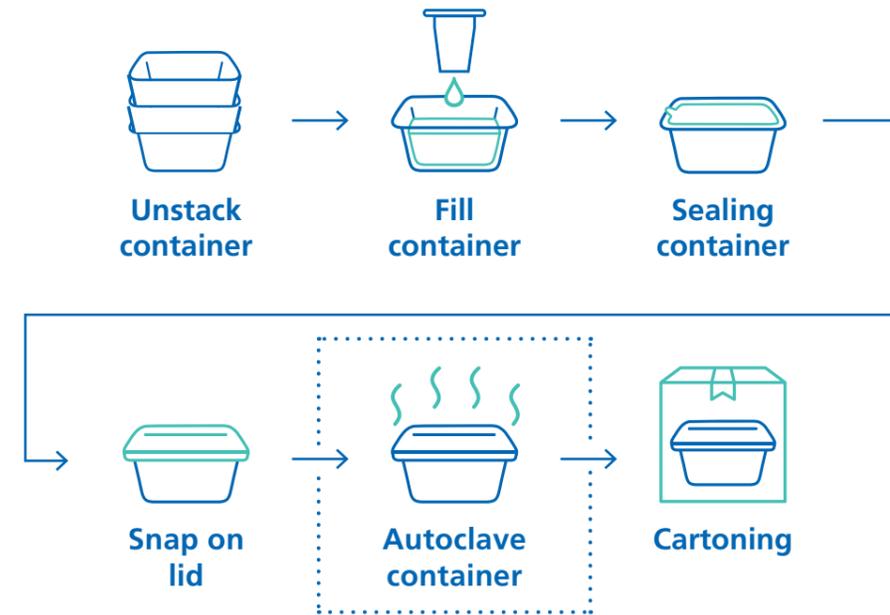

The filling process

For every form and filling

The modular system from DOSOMAT

DOSOMAT inline machine – the powerful one

Inline machine with innovative open machine concept for best ergonomics and cleanability.

DOSOMAT

The perfect filling system for every product

Alu/Plastic

Bucket

Carton

Key Features

Modular design for maximum safety & flexibility

Packaging sterilisation with different systems or clean air cabin

Product-carrying parts made from high-grade alloyed stainless steels and food-safe plastics

Easy disassembly, cleaning and maintenance next to the machine

Simple cup change through quick change device for the format parts

Sealing pressure of over one tonne per cup produces tight autoclave-compatible seams

Our experts for your support

Whether maintenance, accessories, repairs or spare parts - we have experienced experts for every service area and every product to support you. And not just in Germany, but worldwide. As Flying Doctors, they take care of even the most distant Dosomat and can guarantee the safety of our machines in over 100 countries around the world. Our on-site service is also available to our customers for modernisation, disassembly and reassembly.
